

AV RIDER

Requirements:

- Large screen and a projector to display the PowerPoint slide deck
- Audio input and venue-appropriate speakers for the multimedia (video and audio clips) embedded in the PowerPoint slide deck
- Handheld clicker to advance the slides (Adam will control the slide deck throughout his presentation)
- Wireless lavalier microphone strongly preferred, but a handheld microphone is ok
- Audience microphone

Strong Preferences:

- Confidence monitor visible to the speaker
- High-speed internet connection
- Pens and paper accessible to all attendees for note-taking
- A tech person to be on hand throughout the presentation to manage any potential AV issues
- A staff member to be on hand to control the audience microphone

Additional Notes:

- Please provide access to the presentation room at least one hour before the event for setup and sound check.
- Adam will bring his presentation on a USB drive and/or will email it in advance, as he prefers connecting directly to the AV system. If needed, Adam can connect his laptop via HDMI.
- Adam does not use a lectern.
- Adam reserves the right to video record his presentation. The event organizer may record the keynote and provide replay access per the terms of the Speaker Agreement. A high-quality copy of any recording provided by the organizer is highly appreciated.
